do's & don'ts

when creating coverprints for SteelBook, PhotoBook, PortFolio and DuoBinder

- 1 - There is a template (PDF and InDesign file) for each SteelBook and PhotoBook size.
Always ask your Unibind contact person for the corresponding template.
- 2 - Please follow these do's & don'ts to make your artwork.

The Template

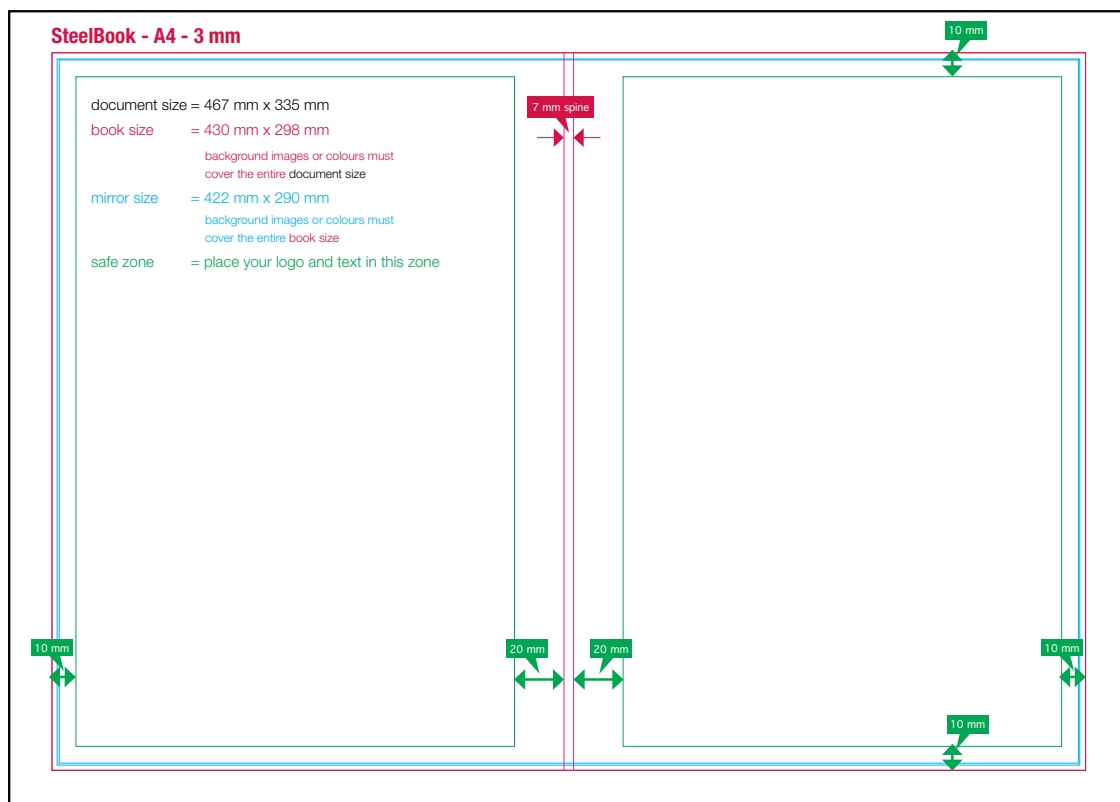

- On top you will find the product name, the format and the spine size in mm.
Always check that you are using the right template.
- On each template you will find several frames in different colours.
Each colour indicates a particular size:

Black frame = **document size** = the size of your artwork.

Red frame = **book size** = the actual size of your bookcover

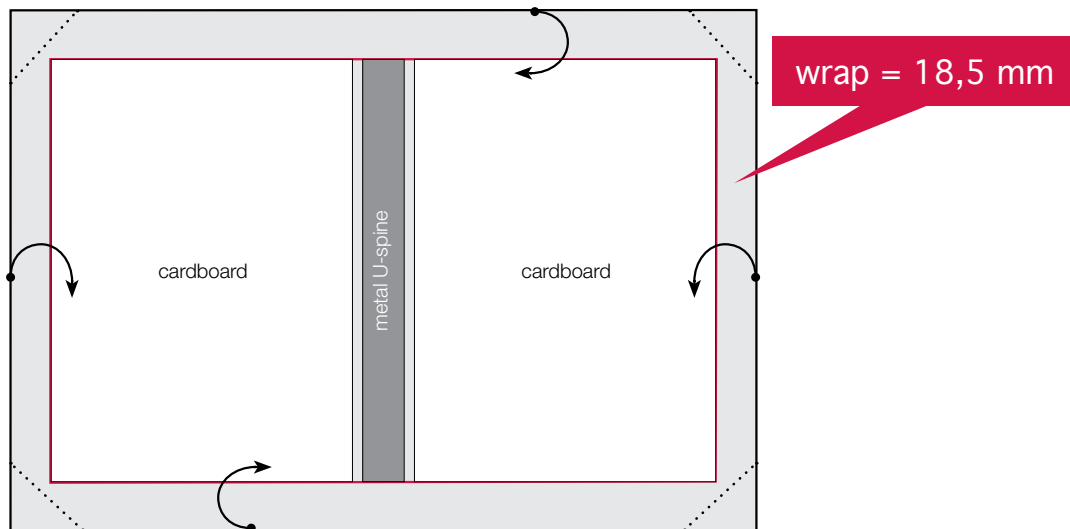

Blue frame = **mirror size** = the actual size of your mirror page

Green frame = **safe zone** = the zone where you can safely put text and logo

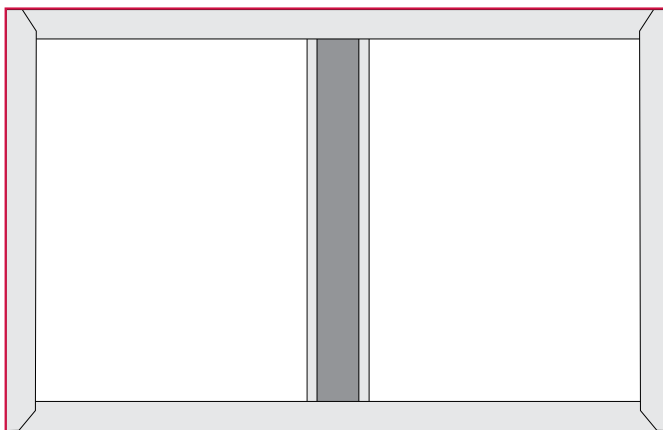

More info about the coloured frames

Black = document size = book size + wrap - 18,5 mm on all sides

▽ wrapping

Red = book size = actual size of your bookcover

▽ placing the mirror

Blue = mirror size = inside of your bookcover

The outside - cover, spine and back cover

Green = safe zone

= to prevent that your text or logo will fall out the book size

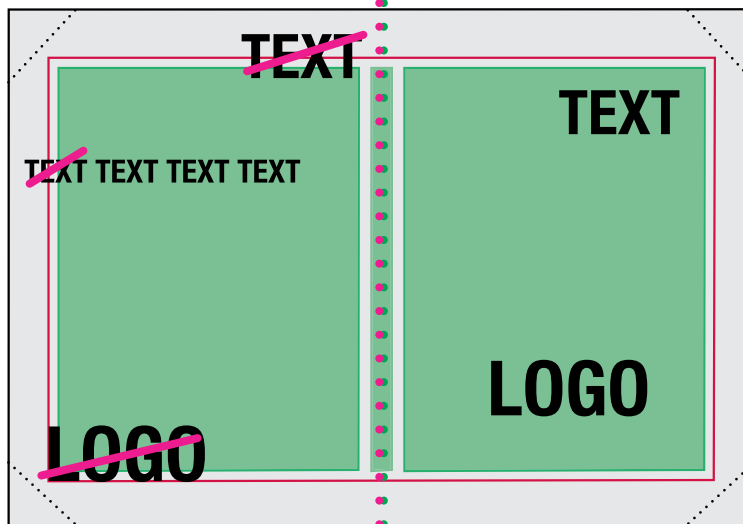

NOT OK

OK

background images or colours must cover the entire document size

NOT OK

OK

place your logo and text in the **safe zone**

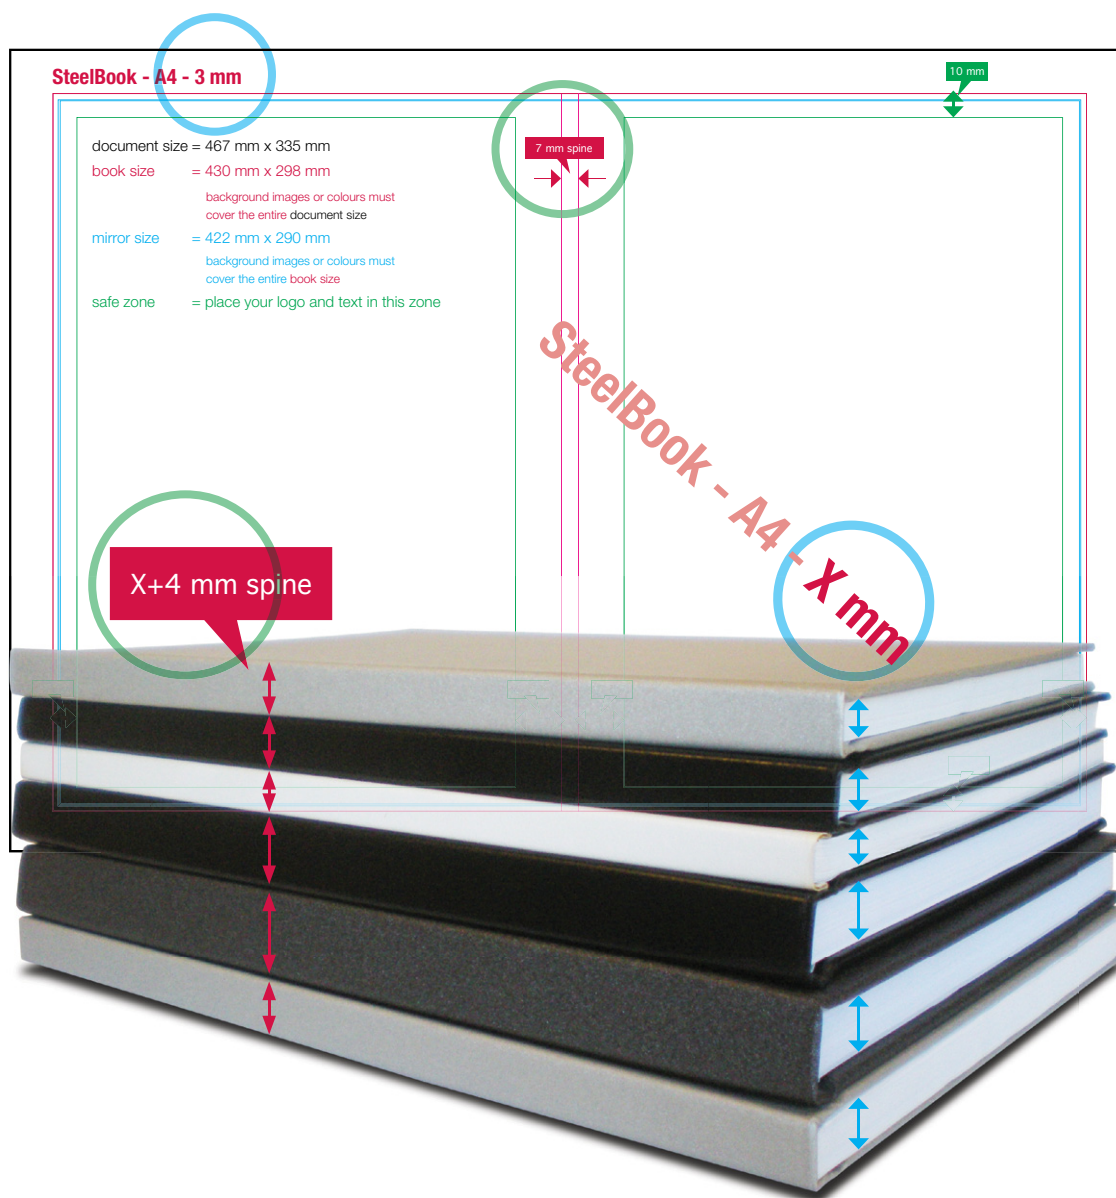

Spine width

SteelBook - A4 - 3 mm

3 mm indicates the **maximum thickness for the book block**, not the external spine width (spine size **inside** the book)

7 mm spine

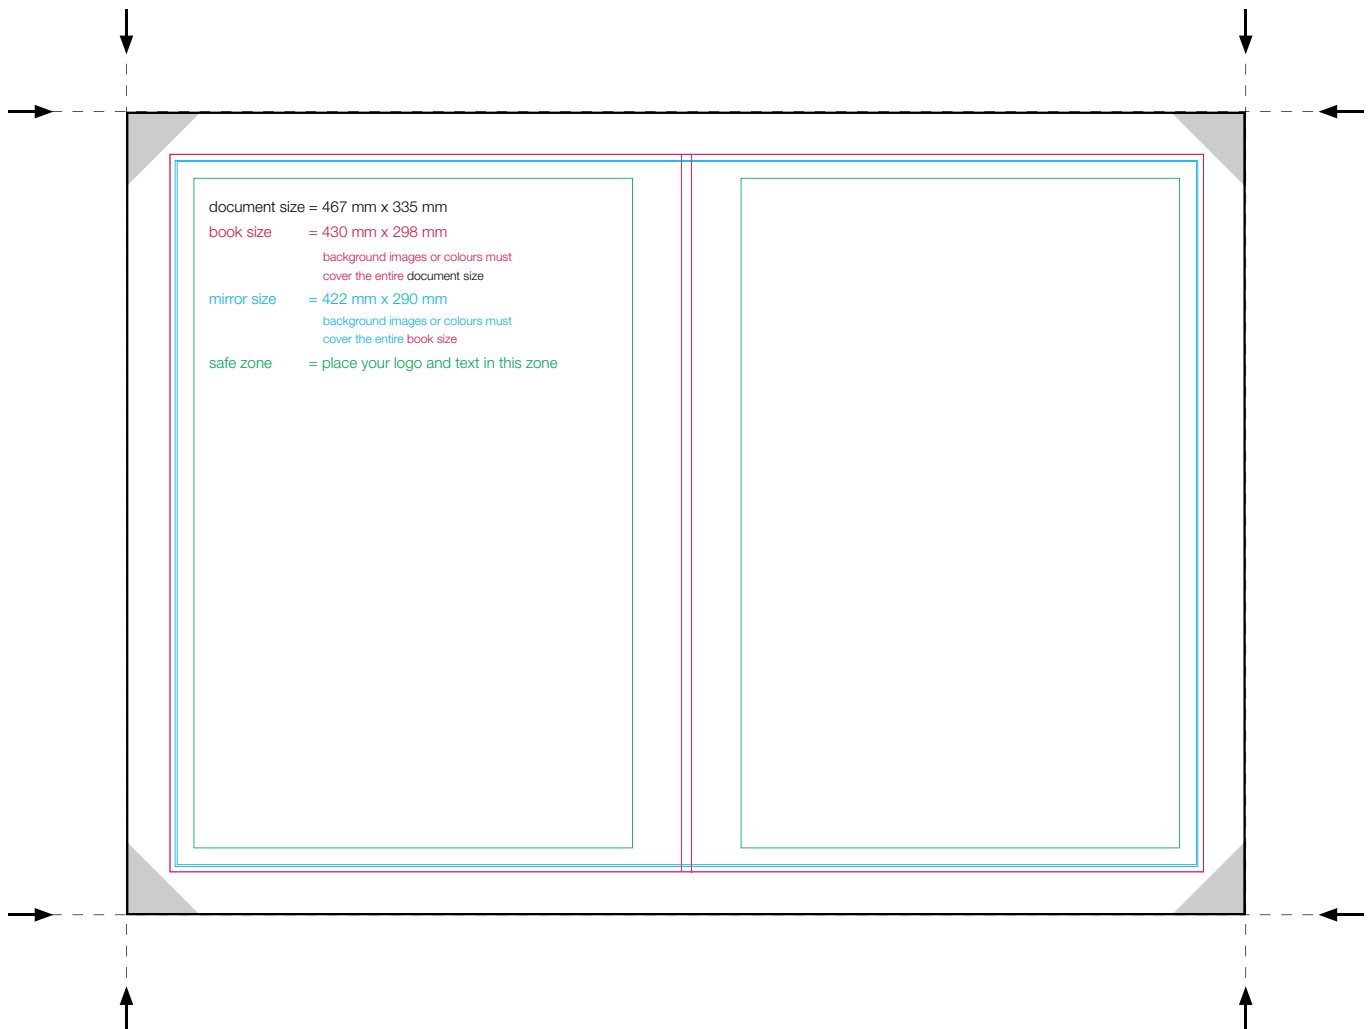

7 mm (3 mm + 4 mm) is the **external spine width** (at the **outside** of the book)

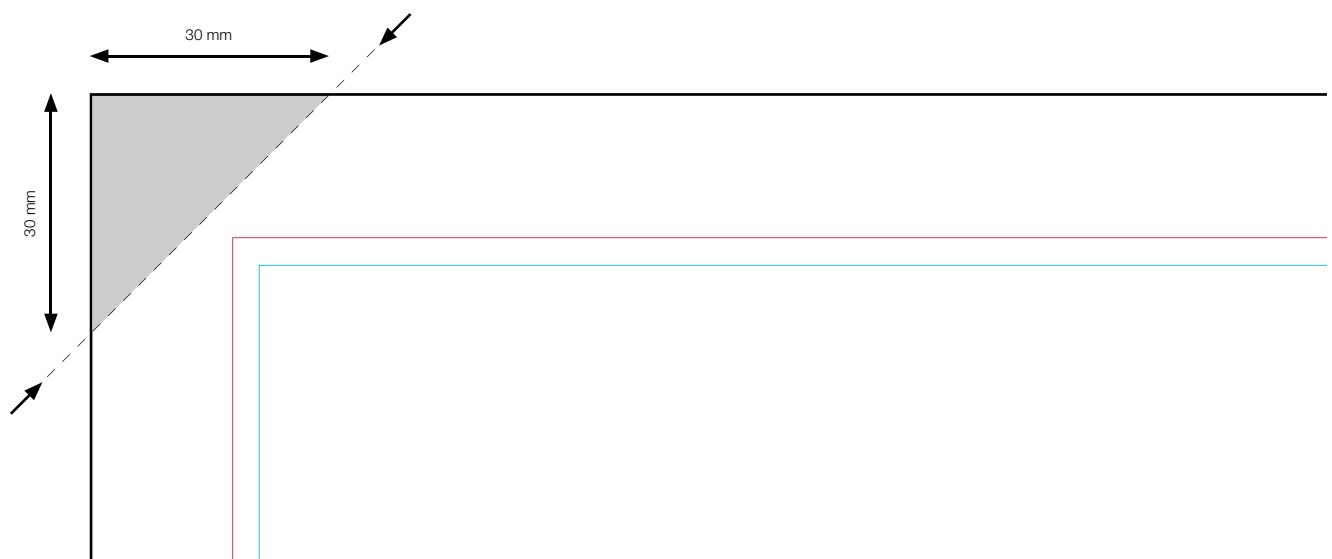

Cutting the cover material

The last preparation is cutting the cover material.

Cut along the black lines of the template = **document size**

Then cut the 4 **corners** as marked on the template with the gray triangle.
